

Project Documentation and Report:

SHORT TERM INTERNSHIP ON SALES FORCE

Project Title: Implementing Crm For Result Tracking Of a Candidate With Internal Marks

Faculty Mentor: S. Asif Alisha

Team ID: [LTVIP2023TMID10649](#)

Team Size: 5

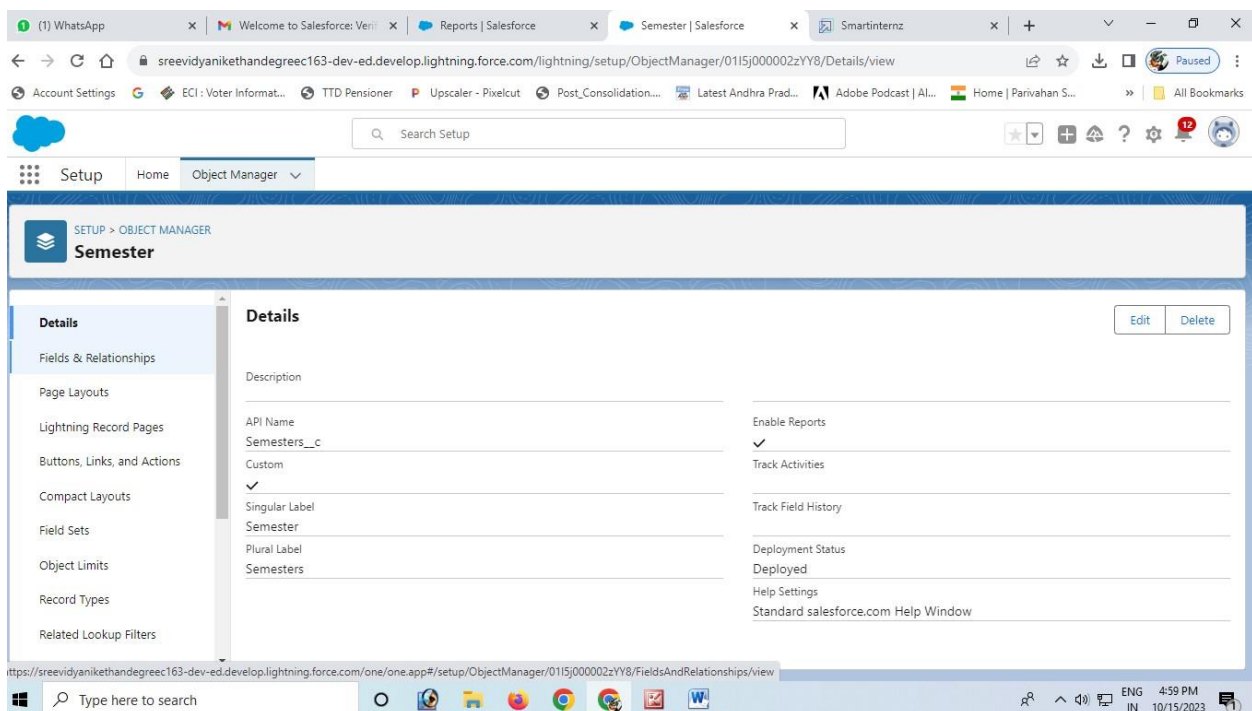

Team Leader: DEVAPATLA VEENA

Team Members: 1.G KAVYA SRI
2.G JAHNAVI
3.B LAHARI
4.B CHANDANA

Milestone – 02: Creation of Objects

Object – Semester

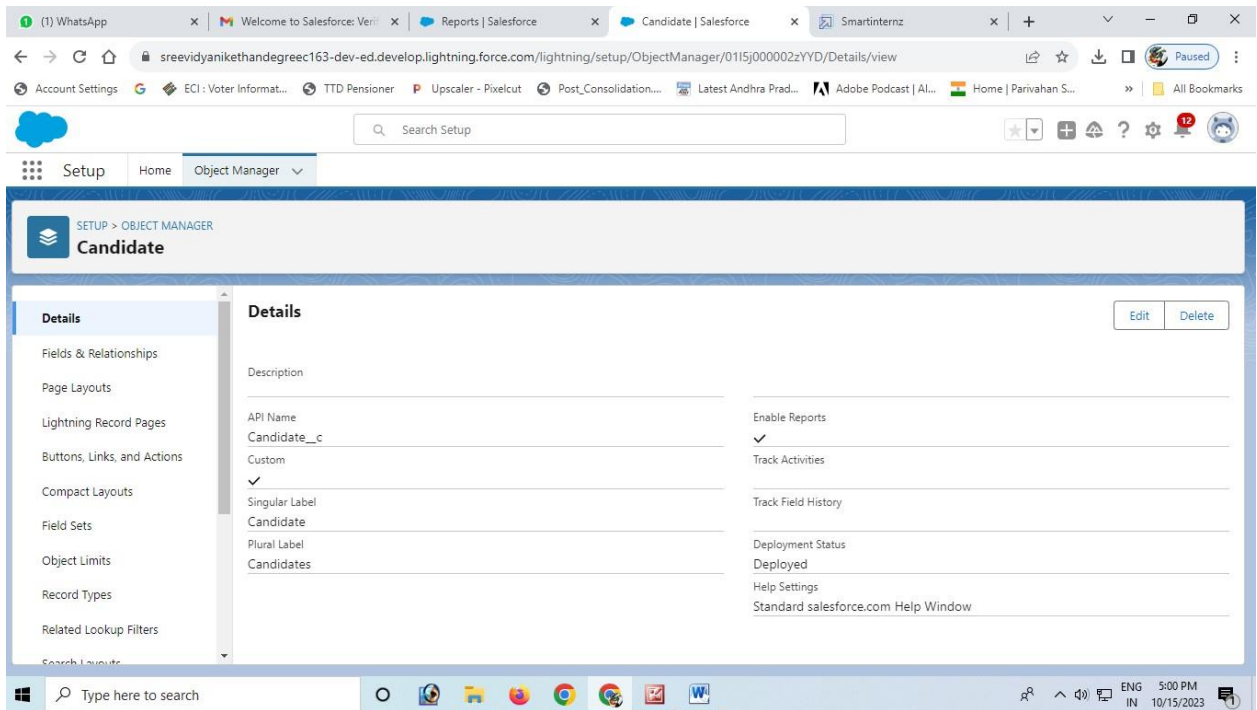

1. Click on the gear icon and then select Setup.
2. Click on the object manager tab just beside the home tab.
3. After the above steps, have a look on the extreme right you will find a Create Drop down click on that and select Custom Object.
4. On the Custom Object Definition page, create the object as follows:
5. Label: **Semester**
6. Plural Label: Semesters
7. Record Name: Semester Name
8. Check the Allow Reports
9. Check the Allow Search 10. 10.Click Save.

Object – Candidate

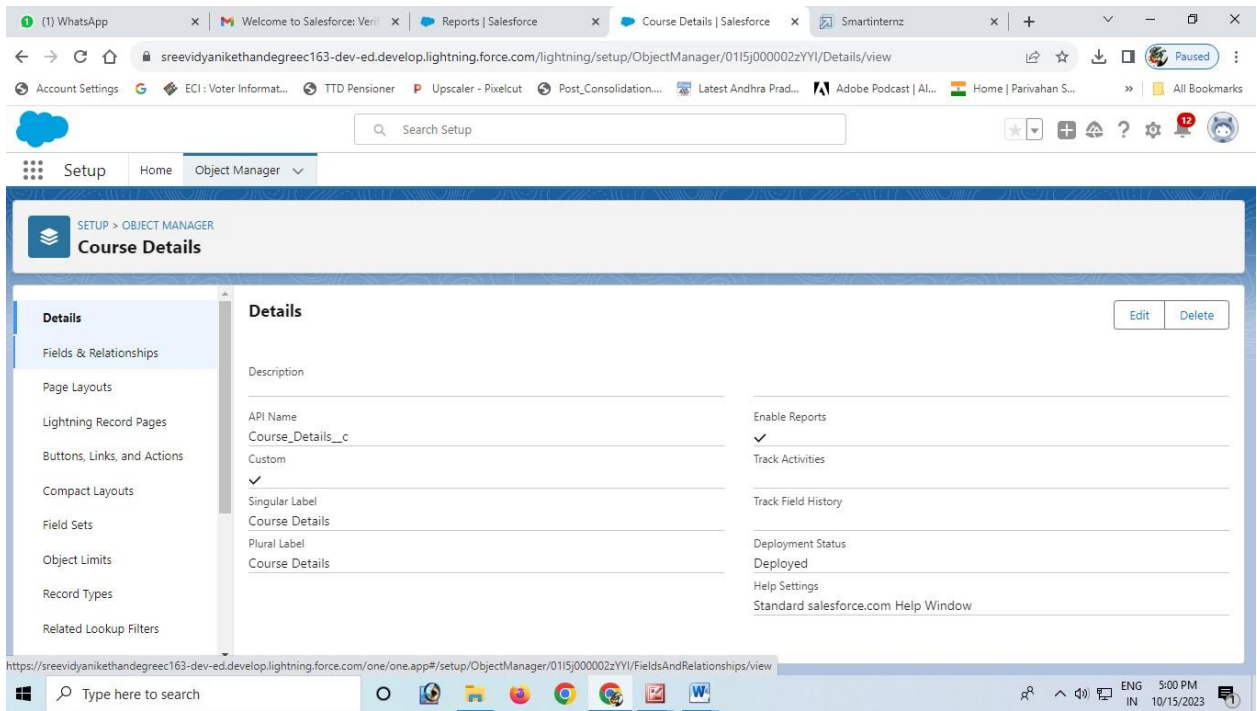

1. Click on the gear icon and then select Setup.
2. Click on the object manager tab just beside the home tab.
3. After the above steps, have a look on the extreme right you will find a Create Drop down click on that and select Custom Object.
4. On the Custom Object Definition page, create the object as follows:
5. Label: **Candidate**
6. Plural Label: Candidates
7. Record Name: Candidate Name

8. Check the Allow Reports
9. Check the Allow Search
10. Click Save

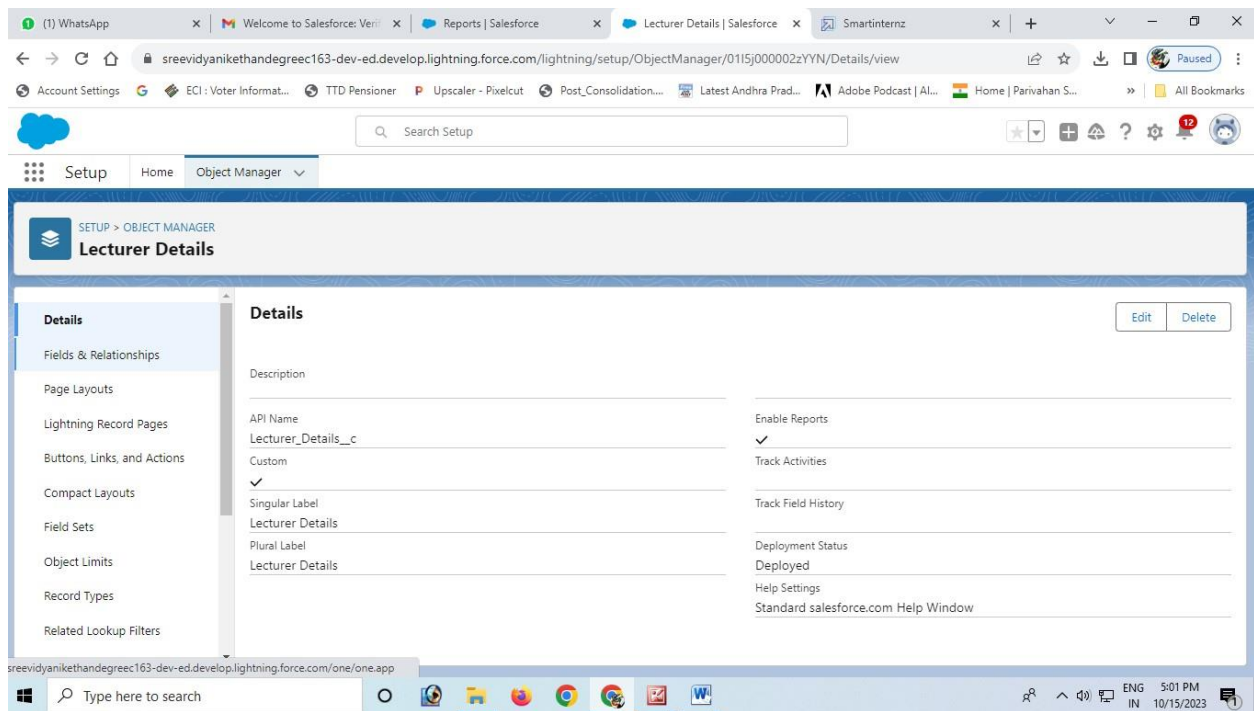

Object – Course Details

1. Click on the object manager tab just beside the home tab
2. After the above steps, have a look on the extreme right you will find a Create Drop down click on that and select Custom Object.
3. On the Custom Object Definition page, create the object as follows:
4. Label: **Course Details**
5. Plural Label: course details
6. Record Name: course details Name
7. Check the Allow Reports
8. Check the Allow Search Click Save.

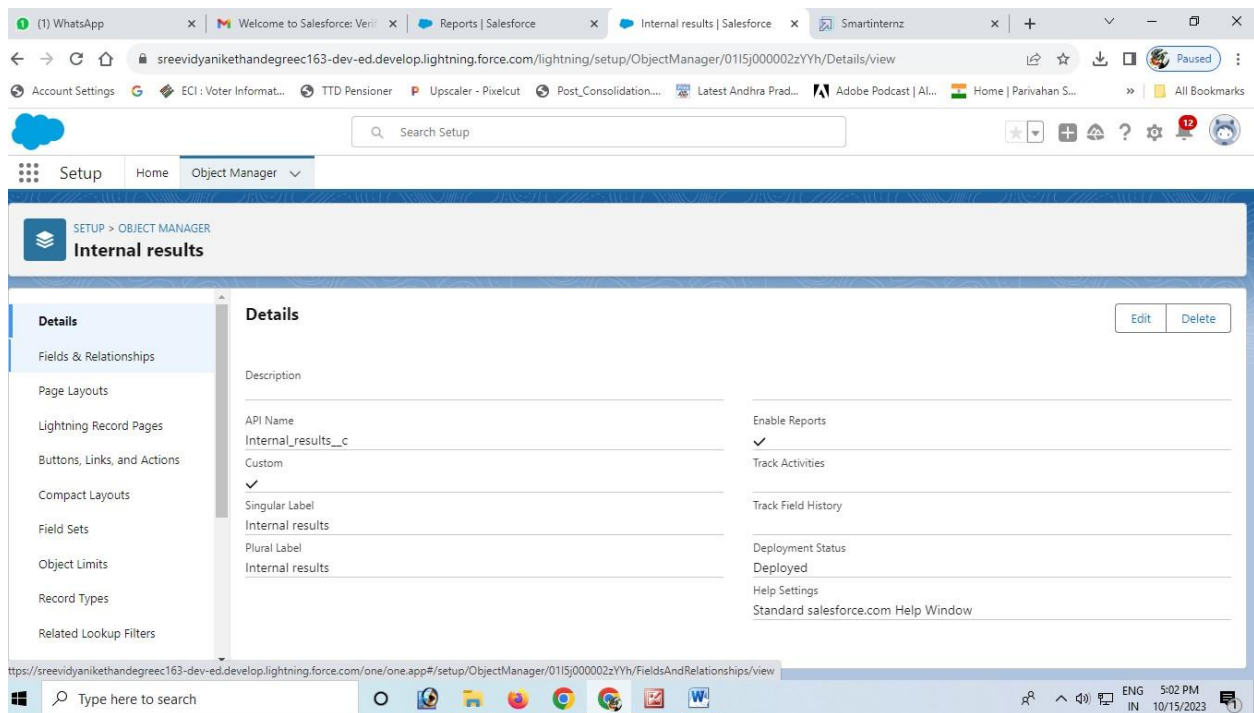

Object – Lecturer Details

1. Click on the gear icon and then select Setup.
2. Click on the object manager tab just beside the home tab.
3. After the above steps, have a look on the extreme right you will find a Create Drop down click on that and select Custom Object.
4. On the Custom Object Definition page, create the object as follows:
5. Label: **Lecturer Details**
6. Plural Label: Lecturer Details
7. Record Name: Lecturer Details Name
8. Check the Allow Reports
9. Check the Allow Search 10. 10.Click Save.

1. **Object – Internal results**
2. Click on the gear icon and then select Setup.
3. Click on the object manager tab just beside the home tab.
4. After the above steps, have a look on the extreme right you will find a Create Drop down click on that and select Custom Object.
5. On the Custom Object Definition page, create the object as follows:
6. Label: – **Internal results**
7. Plural Label: Internal results
8. Record Name: Internal results Name
9. Check the Allow Reports
10. Check the Allow Search 11. 10.Click Save.

Milestone – 03: Tabs

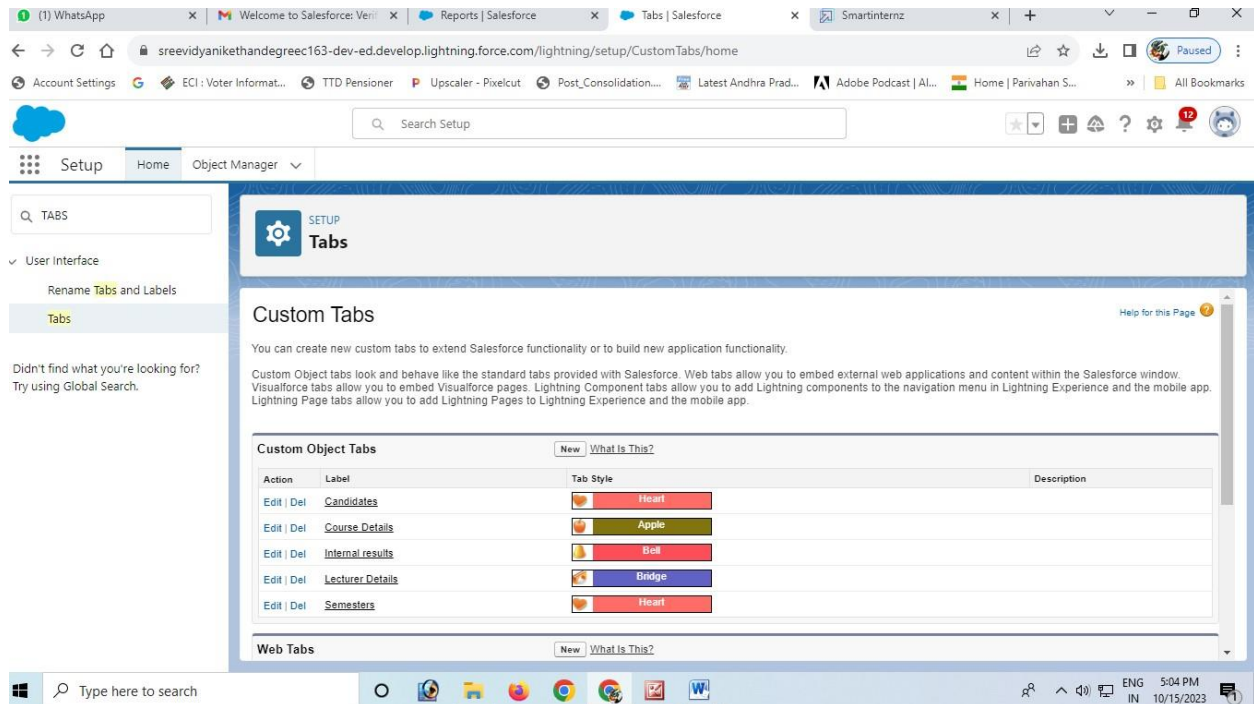

Tabs in Salesforce help users view the information at a glance. It displays the data of objects and other web content in the application.

There are mainly 4 types of tabs:

- Standard Object Tabs: Standard object tabs display data related to standard objects
- Custom Object Tabs: Custom object tabs displays data related to custom objects.
- Web Tabs: Web Tabs display any external Web-based application or Web page in a Salesforce tabs.
- Visual force Tabs: Visual force Tabs display data from a Visual force Page. Creation of semester candidate internal result card

Now create a custom tab. Click the Home tab.

- Enter Tabs in Quick Find and select Tabs.
- Under Custom Object Tabs, click New.
- For Object, select Semester.
- For Tab Style, select any icon.
- Leave all defaults as is. Click Next, Next, and Save
- In the same way create Tabs for all Custom Objects -Candidate, Course Details, Lecturer Details, Internal results.

Milestone – 04: Lightning app

Apps in Salesforce are a group of tabs that help the application function by working together as a unit. It has a name, a logo, and a particular set of tabs. The simplest app usually has just two tabs. There are two types of app

1. **Standard App:** Standard apps come with every occurrence of Salesforce as default. Many features like Sales, Marketing, Community, call center content, Salesforce chatter, App Launcher, etc are present in it. Note: The description, Logo, and Label of standard app cannot be altered.
2. **Custom Apps:** Custom apps are created according to need of user. Custom Apps are made by using standard and custom tabs together.

Note: Logos for Custom Apps can be changed.

Create The Candidate Internal Result Card App

1. From Setup, enter App Manager in the Quick Find and select App Manager.
2. Click New Lightning App.
3. Enter Candidate Internal Result Card as the App Name, then click next
4. Under App Options, leave the default selections and click next.
5. Under Utility Items, leave as is and click Next.

6. From Available Items, select Semester, Candidate, Course Details, Lecturer Details, Interna results, Reports, and Dashboards and move them to Selected Items.

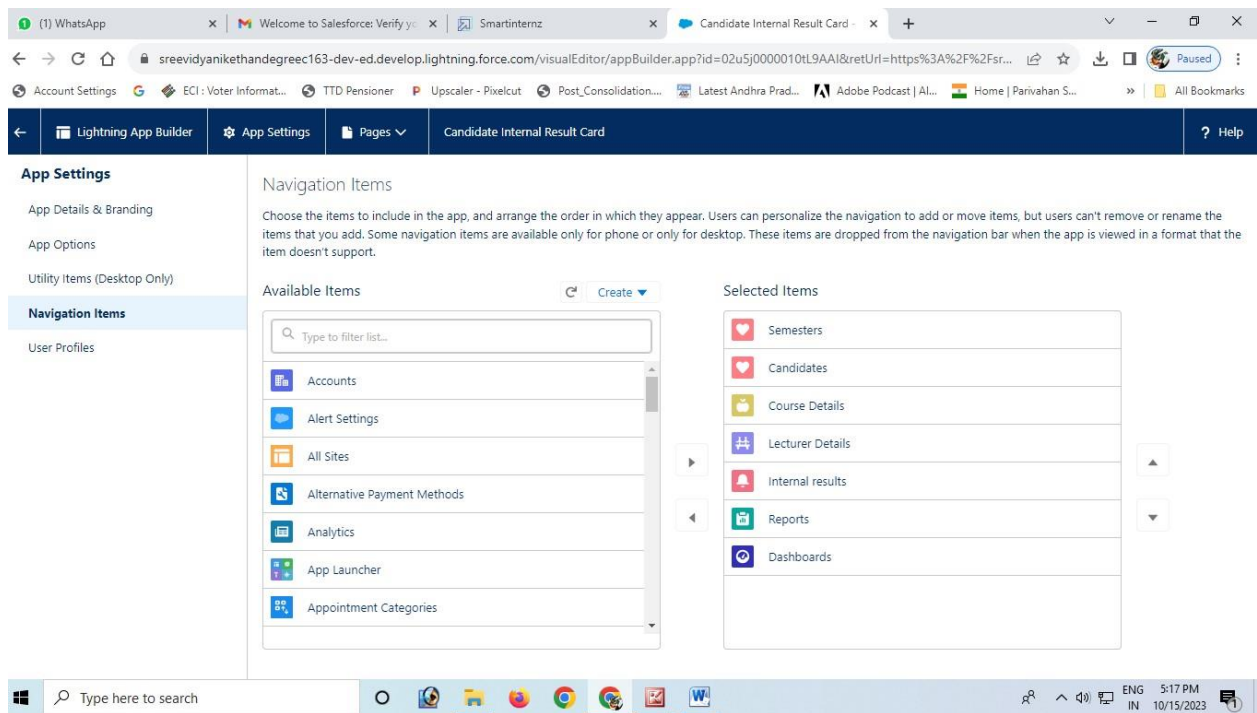

7. Click Next

From Available Profiles, select and move it to Selected Profiles. Click Save & Finish. System Administrator

The screenshot shows the Salesforce Lightning Experience App Manager interface. The left sidebar contains a navigation menu with options like 'App', 'Salesforce Mobile App', 'Data', 'Mass Transfer Approval Requests', 'Apps', 'App Manager', 'AppExchange Marketplace', 'Connected Apps', 'External Client Apps', and 'Lightning Bolt'. The main content area displays a table of 22 items, sorted by App Name. The table has columns for App Name, Developer Name, Description, Last Modified, App Type, and Visibility. The table lists various apps including All Tabs, Analytics Studio, App Launcher, Bolt Solutions, Candidate Internal Result Card, Community, Content, Data Manager, Digital Experiences, and Lightning Usage App.

	App Name ↑	Developer Name	Description	Last Modified ...	Ap...	Vi...
1	All Tabs	AllTabSet		15/10/2023, 11:28 am	Classic	
2	Analytics Studio	Insights	Build CRM Analytics dashboards and apps	15/10/2023, 11:28 am	Classic	✓
3	App Launcher	AppLauncher	App Launcher tabs	15/10/2023, 11:28 am	Classic	✓
4	Bolt Solutions	LightningBolt	Discover and manage business solutions design...	15/10/2023, 11:28 am	Lightning	✓
5	Candidate Internal Result Ca...	Candidate_Internal_Result_Card		15/10/2023, 11:58 am	Lightning	✓
6	Community	Community	Salesforce CRM Communities	15/10/2023, 11:28 am	Classic	✓
7	Content	Content	Salesforce CRM Content	15/10/2023, 11:28 am	Classic	✓
8	Data Manager	DataManager	Use Data Manager to view limits, monitor usage,...	15/10/2023, 11:28 am	Lightning	✓
9	Digital Experiences	SalesforceCMS	Manage content and media for all of your sites.	15/10/2023, 11:28 am	Lightning	✓
10	Lightning Usage App	LightningInstrumentation	View Adoption and Usage Metrics for Lightning ...	15/10/2023, 11:28 am	Lightning	✓

The screenshot shows the 'New Lightning App' configuration window. It is divided into two main sections: 'App Details' and 'App Branding'. The 'App Details' section includes fields for 'App Name' (Candidate Internal Result Card), 'Developer Name' (Candidate_Internal_Result_Card), and 'Description' (Enter a description...). The 'App Branding' section includes an 'Image' upload button, a 'Primary Color Hex Value' field (set to #0070D2), and an 'Org Theme Options' checkbox (unchecked). Below these sections is an 'App Launcher Preview' area. A 'Next' button is located at the bottom right of the window.

Milestone – 05: fields and relationship

Fields And Relationship

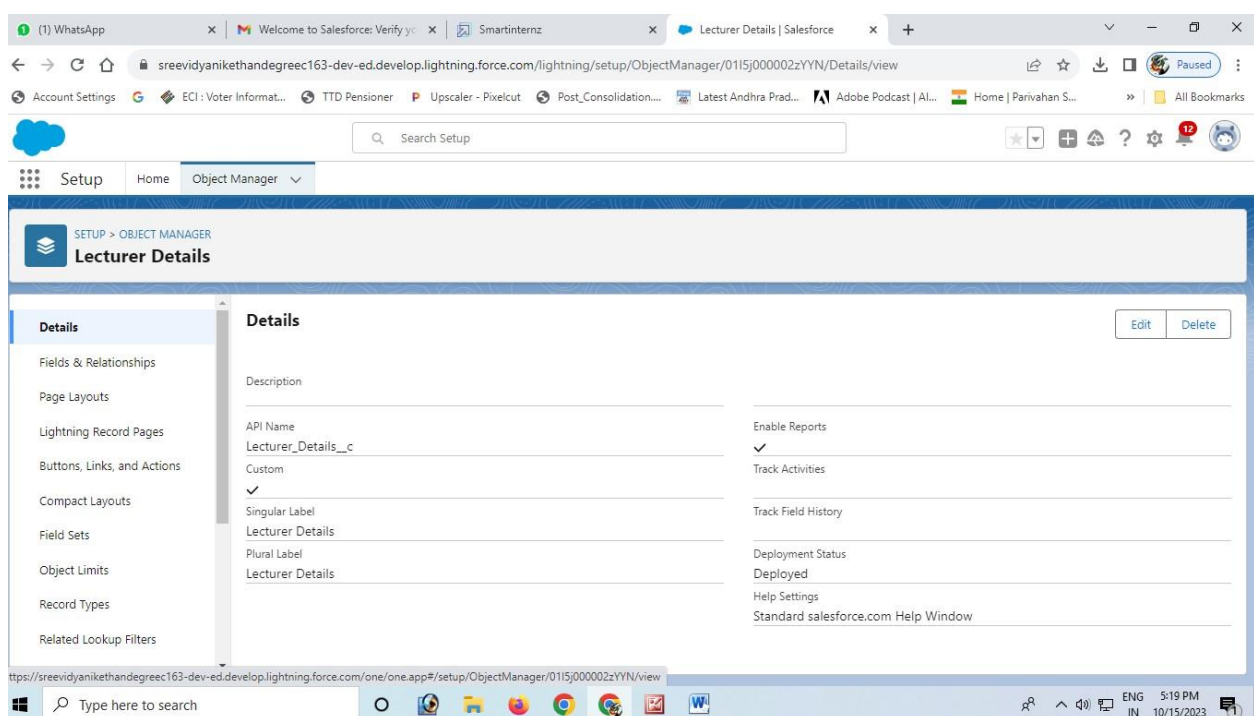

Fields - Fields store data values that are required for a particular object in a record . An object relationship in Salesforce is a two-way association between two objects. Relationships are created by creating custom relationship fields on an object. This is done so that when users view records, they can also see and access

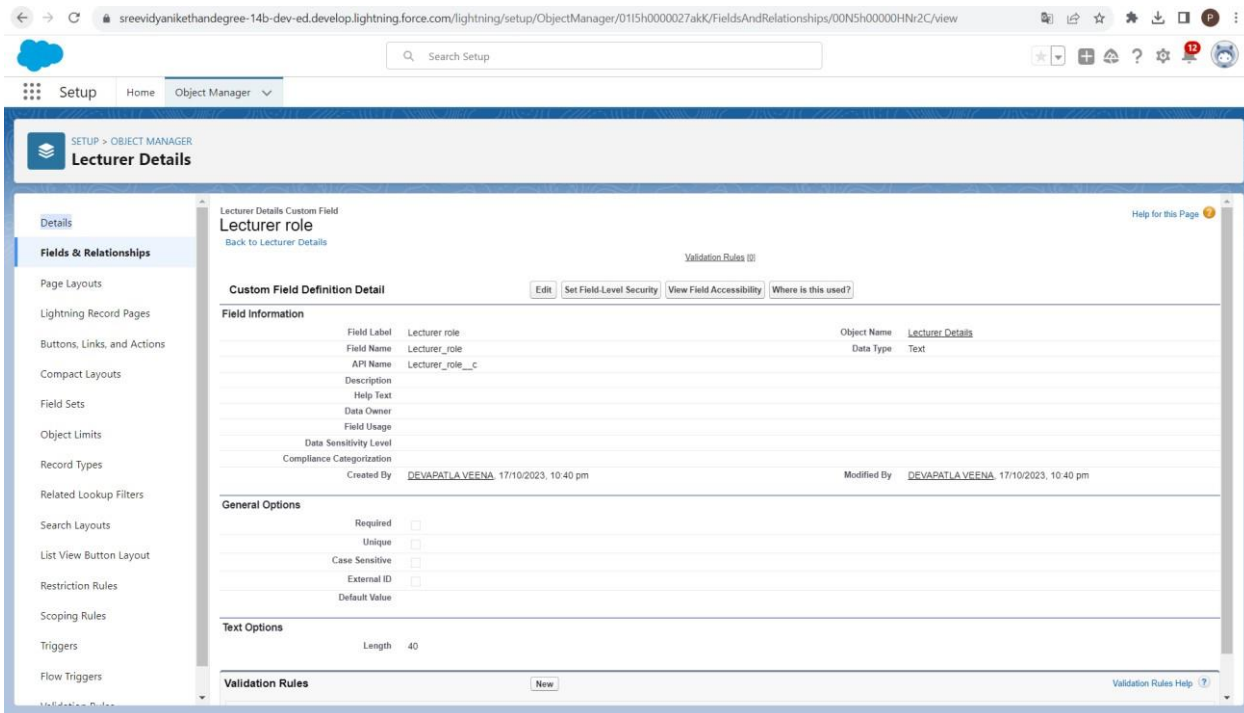

Object Name	Field Name	Data type
Semester	Semester Name Course	Text(Standard field) Lookup(Course Details)
Candidate	Candidate Name Candidate Roll Number Semester Name	Text(Standard field) Auto Number Lookup(Semester
Lecturer Details	Lecturer Name Lecturer Role Course	Text(Standard field) Text Lookup(Course)
Course Details	Course Name Duration (Years)	Text(Standard field) Number

Internal results	Candidate Candidate Roll Number Course Marks	Lookup (candidate) Formula Lookup(Course) Number
------------------	---	---

Creation Of Text Field On "Lecturer Details" & Look Up Field For The "Candidate" Object

1. Click the gear icon and select Setup. This launches Setup in a new tab.
2. Click the Object Manager tab next to Home.
3. Select Lecturer Details
4. Select Fields & Relationships from the left navigation
5. Click New
6. Select the Text as the Data Type, click next.
7. For Field Label, enter Lecturer Role
8. Enter Length 40
9. Click Next, Next, then Save & New

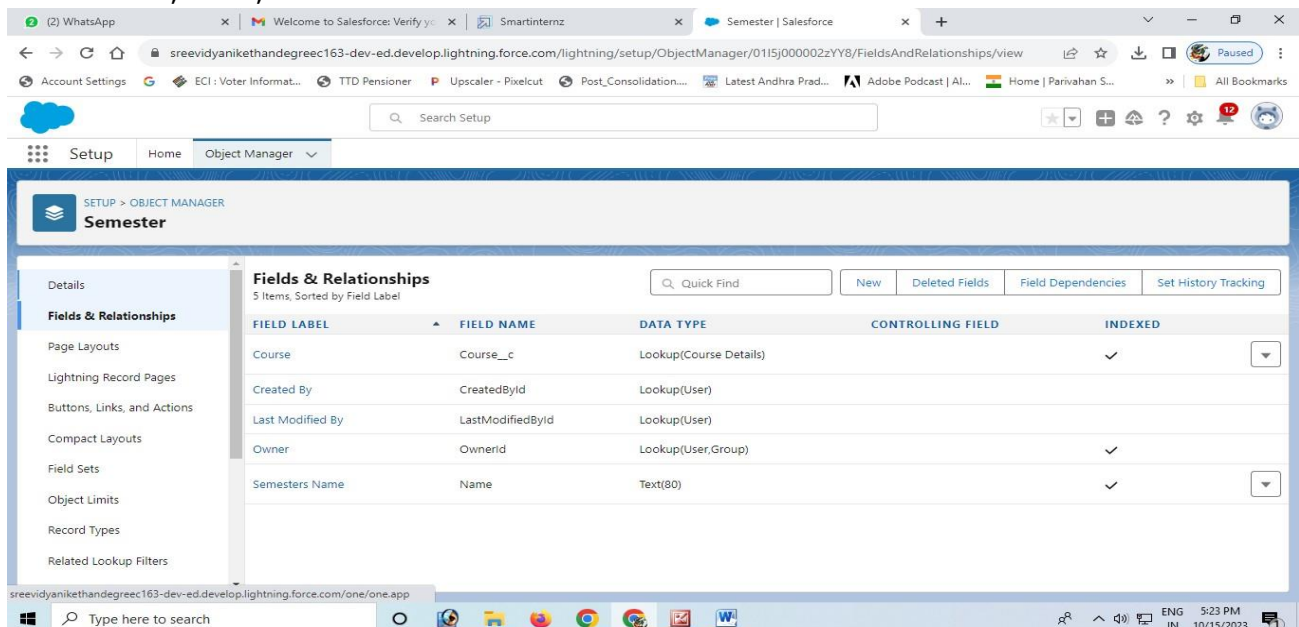

Now Let's create a Lookup field on candidate object

1. Click the gear icon and select Setup. This launches Setup in a new tab.
2. Click the Object Manager tab next to Home.
3. Select candidate.
4. Select Fields & Relationships from the left navigation
 1. Click New
 2. Select the lookup as the Data Type, then click Next.
 3. In related select Semester
 4. For Field Label Semester Name, enter.

Click Next, Next, then Save & New

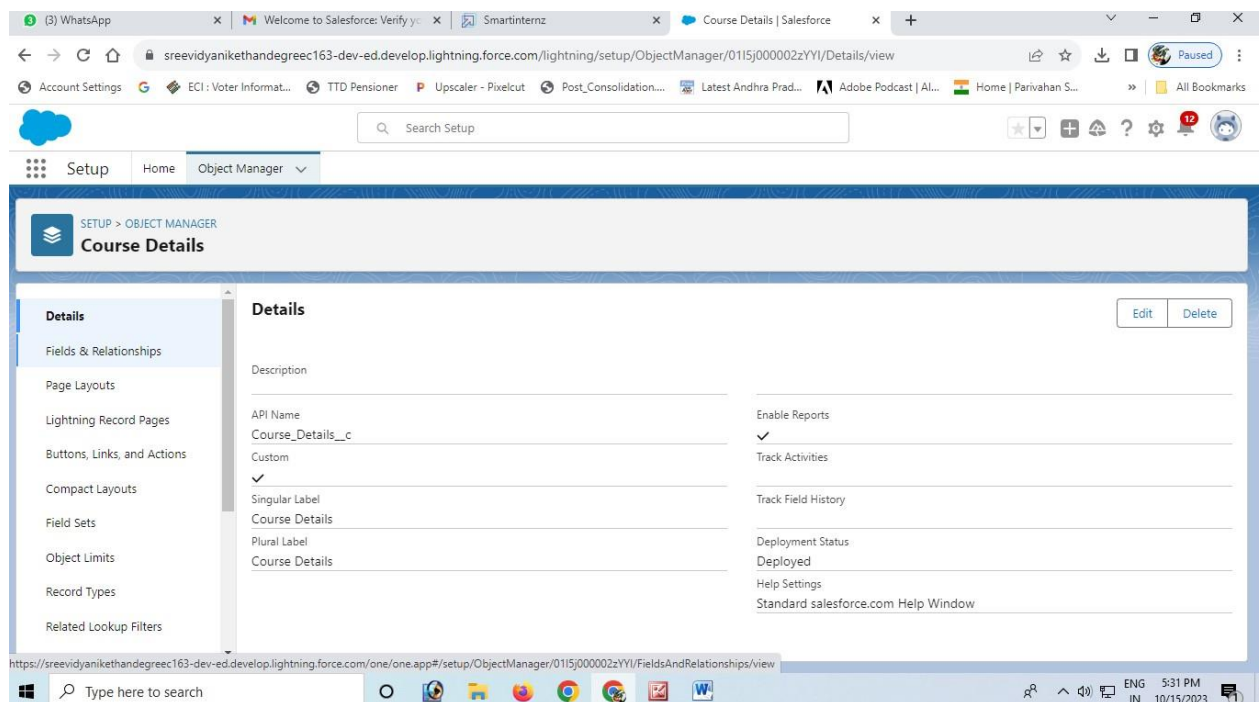

Creation Of Auto Number Field On Candidate Object, Number Field On Course Details Object & Formula Field Course Details Object

Let's create a Number field on Course Details object

1. Click the gear icon and select Setup. This launches Setup in a new tab.
2. Click the Object Manager tab next to Home.
3. Select Course Detail.

Select Fields & Relationships from the left navigatio

Creation Of Auto Number Field On Candidate Object, Number Field On Course Details Object & Formula Field Course Details Object

Let's create a Number field on Course Details object

4. Click the gear icon and select Setup. This launches Setup in a new tab.
5. Click the Object Manager tab next to Home.

6. Select Course Detail.

7. Select Fields & Relationships from the left navigation

8. Click New & select number field, click Next

9. For Field Label Duration, enter.

Give Help Text- Enter Course duration value in Years

6. Click Next, Next, then Save & New.

5. Click New & select number field, click Next

6. For Field Label Duration, enter.

7. Give Help Text- Enter Course duration value in Years

8. Click Next, Next, then Save & New.

Now Let's create a Formula field on Internal Results object

1. Click the gear icon and select Setup. This launches Setup in a new tab.

2. Click the Object Manager tab next to Home.

3. Select Internal results.

4. Select Fields & Relationships from the left navigation.

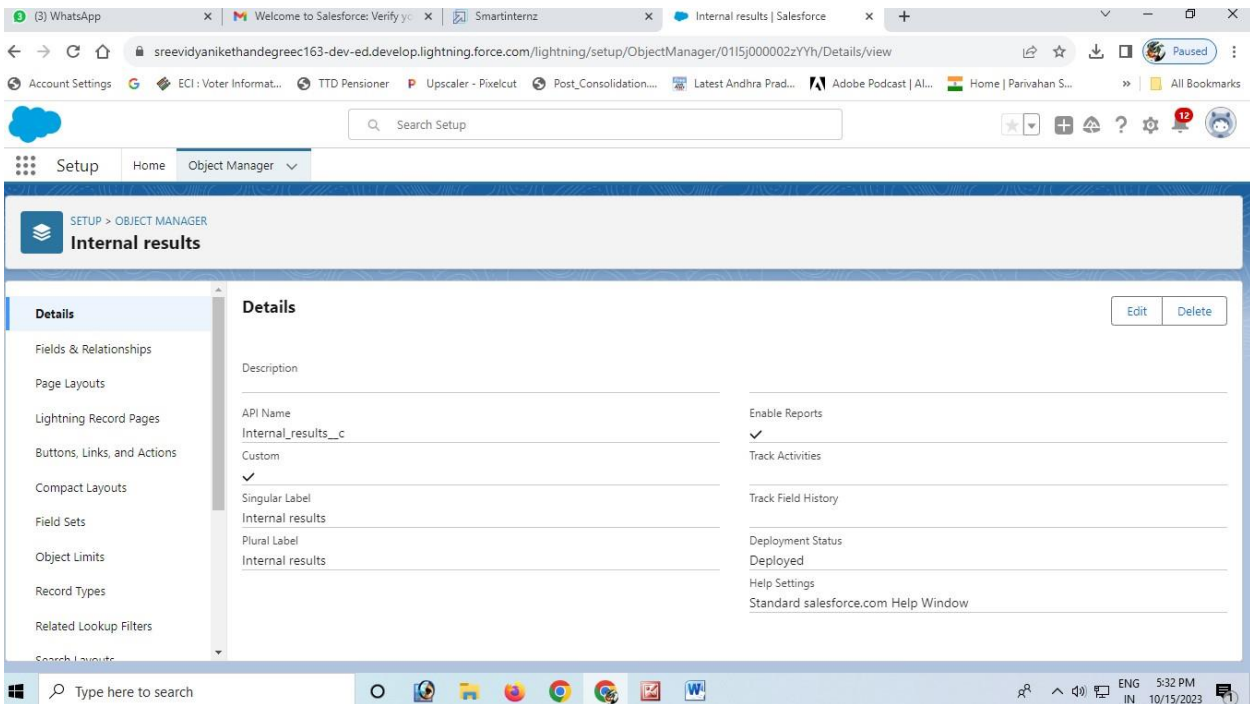

Now Let's create a Formula field on Internal Results object

5. Click the gear icon and select Setup. This launches Setup in a new tab.

6. Click the Object Manager tab next to Home.

7. Select Internal results.

8. Select Fields & Relationships from the left navigation.

9. Click New

10. Select the Formula as the Data Type, then click Next.

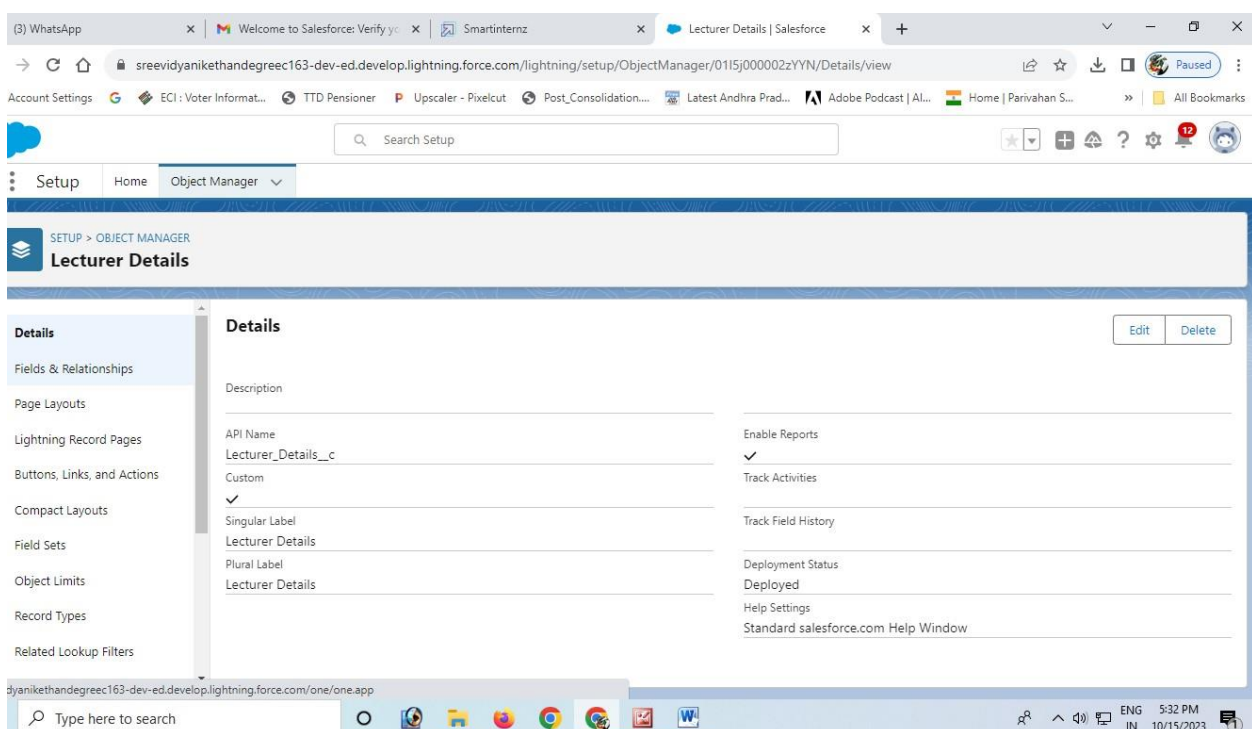

11. Give field label Candidate Roll Number

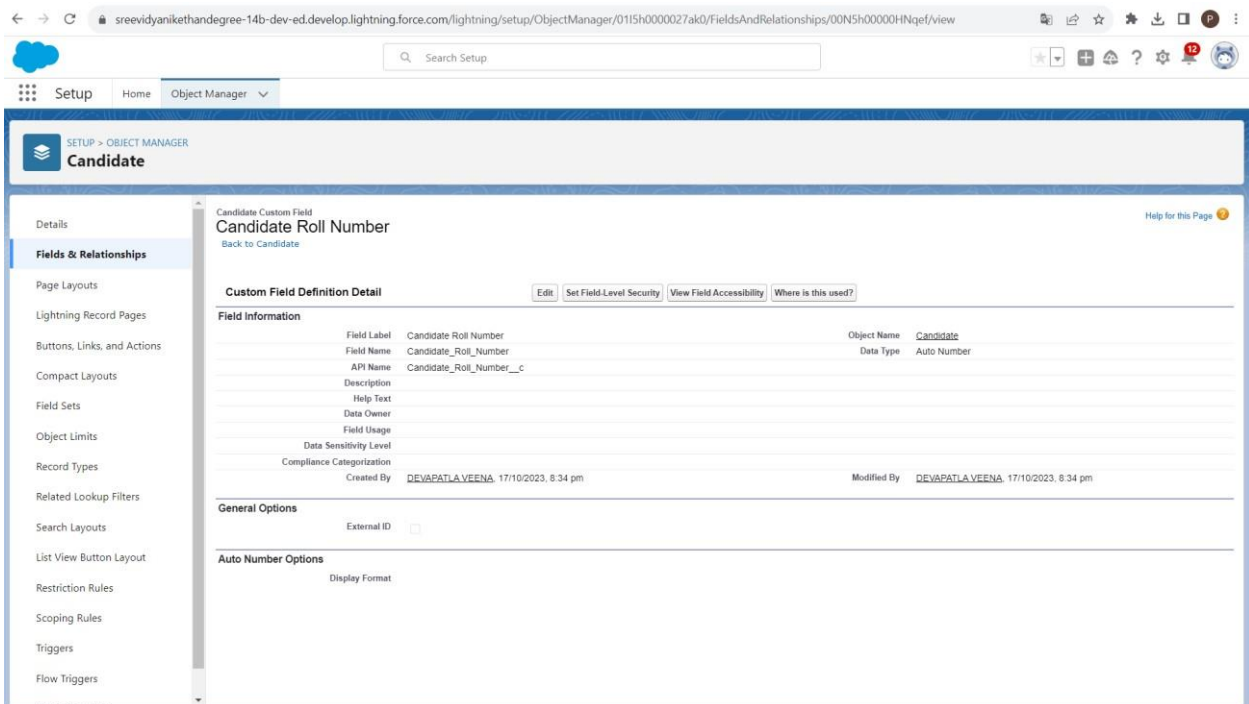

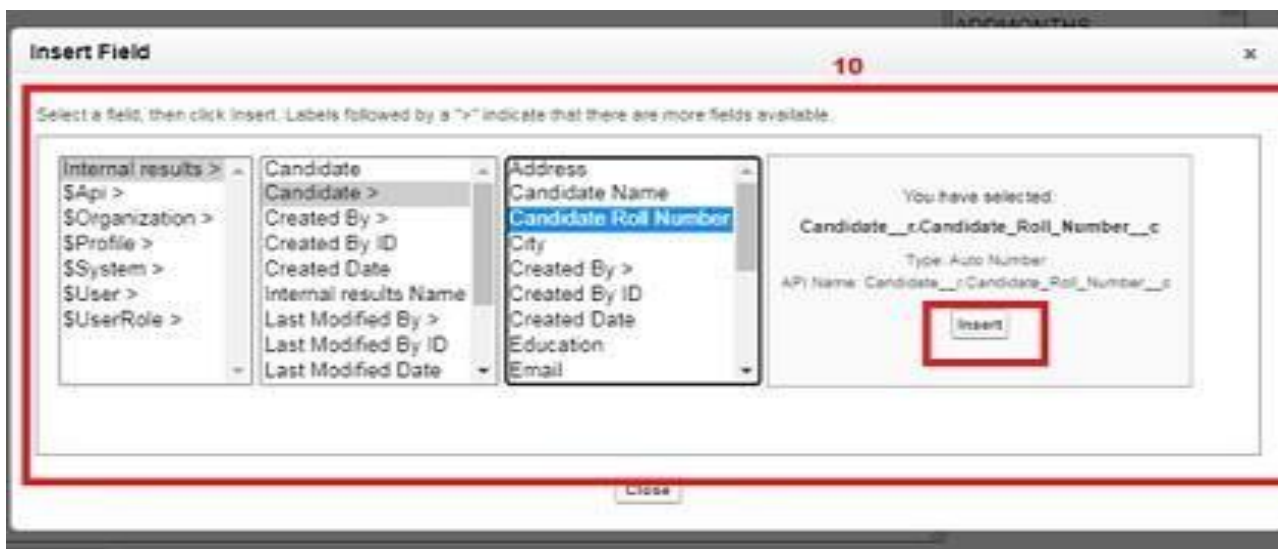

12. Select formula return type text, Click Next

13. Click Insert Field

14. Create and insert formula Candidate r.Candidate_Roll_Number c, and then click Insert.

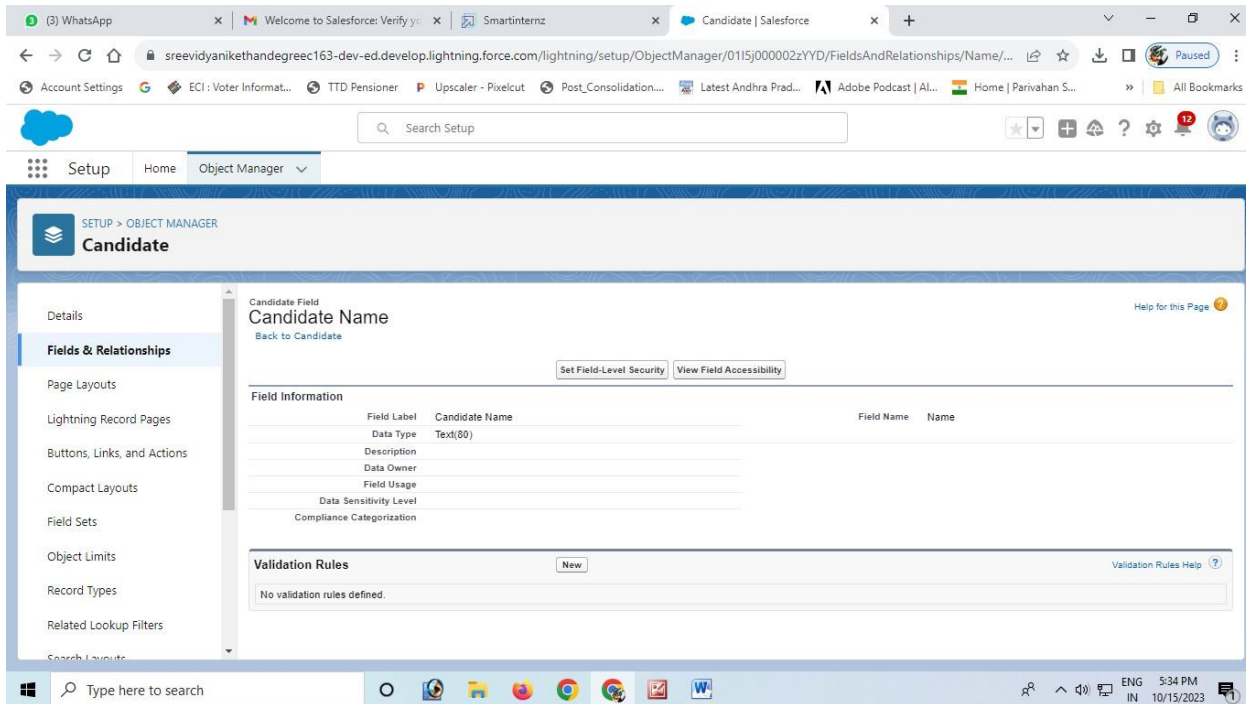

15. Click Next, Next, then Save.

Now Let's create an auto number field on Candidate object

1. Click the gear icon and select Setup. This launches Setup in a new tab.
2. Click the Object Manager tab next to Home.
3. Select Candidate.
4. Select Fields & Relationships from the left navigation

1. Click New
2. Select the Auto Number as the Data Type, then click Next.
3. For Field Label Candidate enter Roll Number.
4. Give a display format
5. Click Next, Next, then Save & New.
6. Click New
7. Select the Auto Number as the Data Type, then click Next.
8. For Field Label Candidate enter Roll Number.
9. Give a display format
10. Click Next, Next, then Save & New.

Milestone – 06: users

Creating A User

1. From Setup, in the Quick Find box, enter Users.
 2. Select Users.
 3. Click New User.
 4. Enter the First Name, Class, Last Name, Teacher and (Your) email address and a unique username in the form of an email address. By default, the username is the same as the email address.
 5. Select a User License as salesforce.
- NOTE- As Salesforce license can only be used by 2 Users at a time in Dev Org, so If you don't find salesforce license then deactivate a user who has salesforce license Or change the license type from Salesforce to any other.
6. Select a profile as Standard user.
 7. Check Generate new password and notify the user immediately to have the user's login name and a temporary password emailed to your email.

The image shows the Salesforce Setup interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The left sidebar shows the 'Users' link selected under 'User Management Settings'. The main content area displays the 'All Users' list with columns for Action, Full Name, Alias, Username, Role, Active, and Profile. A 'New User' button is highlighted. Below the list, the 'User Edit' form is shown with the 'General Information' tab active. The form fields are as follows:

Field	Value
First Name	Class
Last Name	Teacher
Alias	cteach
Email	+++@++++.com
Username	+++@++++.com
Nickname	class
Title	
Company	
Department	
Role	<None Specified>
User License	Salesforce
Profile	Standard User
Active	<input checked="" type="checkbox"/>
Marketing User	<input type="checkbox"/>
Offline User	<input type="checkbox"/>
Knowledge User	<input type="checkbox"/>
Flow User	<input type="checkbox"/>
Service Cloud User	<input type="checkbox"/>

Milestone – 07: user adoption

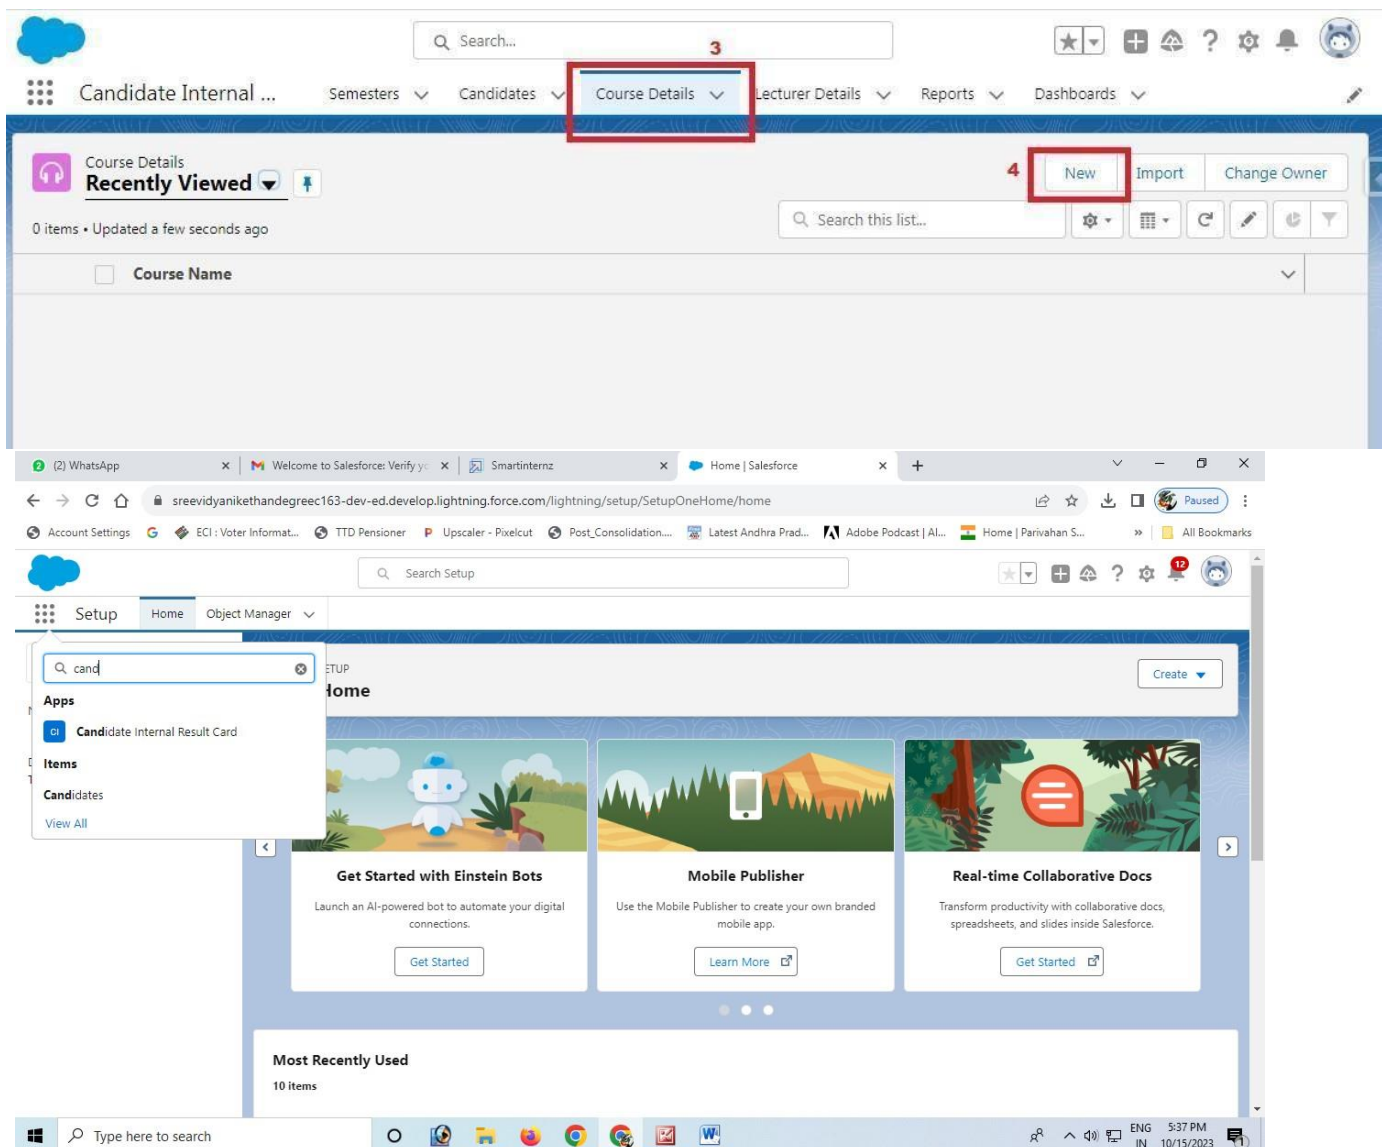

User Adoption

Salesforce user adoption is the simple act of enabling a user to use SFDC's full CRM capabilities by creating strategies around onboarding, training, and continued development – all to drive overall digital adoption.

Create Record (Course Details)

Create Records on Course Details Objects

1. Click on App Launcher on left side of screen.
2. Search Candidate Internal Result Card App & click on it.
3. Click on Course Details tab.
4. Click new button
5. Fill all Course Details record details.
6. Click on Save Button.

View Record (Course Details)

Viewing the Records of Course Detail Object

1. Click on App Launcher on left side of screen.

2. Search Candidate Internal Result Card & click on it.

3. Click on Course details Tab.

4. Click on any record name. you can see the details of the Driver

The image shows a Salesforce Lightning interface. At the top, there is a navigation bar with 'Setup', 'Home', and 'Object Manager'. Below this, a search bar contains 'Candidate Internal Result Card'. A dropdown menu shows 'Apps' with 'Candidate Internal Result Card' and 'Items' with 'No results' and 'View All'. The main content area displays a list of course details under the 'Recently Viewed' tab. The list includes 7 items, each with a checkbox and a course name. The first item is 'BTECH (AUTOMOBILE)'. The second item is 'BCA (DATA SCIENCE)'. The third item is 'BTECH(MECHANICAL)'. The fourth item is 'BSC (NURSING)'. The fifth item is 'BSC(BIO TECHNOLOGY)'. The sixth item is 'BSC(AGRICULTURE)'. The seventh item is 'MBA (FINANCE)'. Below the list, there is a 'Course Details' page for 'BCA (Data Science)'. This page shows the 'Details' tab with fields for 'Course Details Name', 'Duration', 'Course Name', 'Owner', 'Created By', and 'Last Modified By'. The 'Owner' field is 'DEVAPATLA VEENA'. The 'Created By' field is 'DEVAPATLA VEENA, 17/10/2023, 9:05 pm'. The 'Last Modified By' field is 'DEVAPATLA VEENA, 17/10/2023, 9:05 pm'.

Milestone – 08: what are Reports?

What Are Reports?

Reports in Salesforce is a list of records that meet a particular criterion which gives an answer to a particular question. These records are displayed as a table that can be filtered or grouped based on any field.

There are 4 types of report formats in Salesforce:

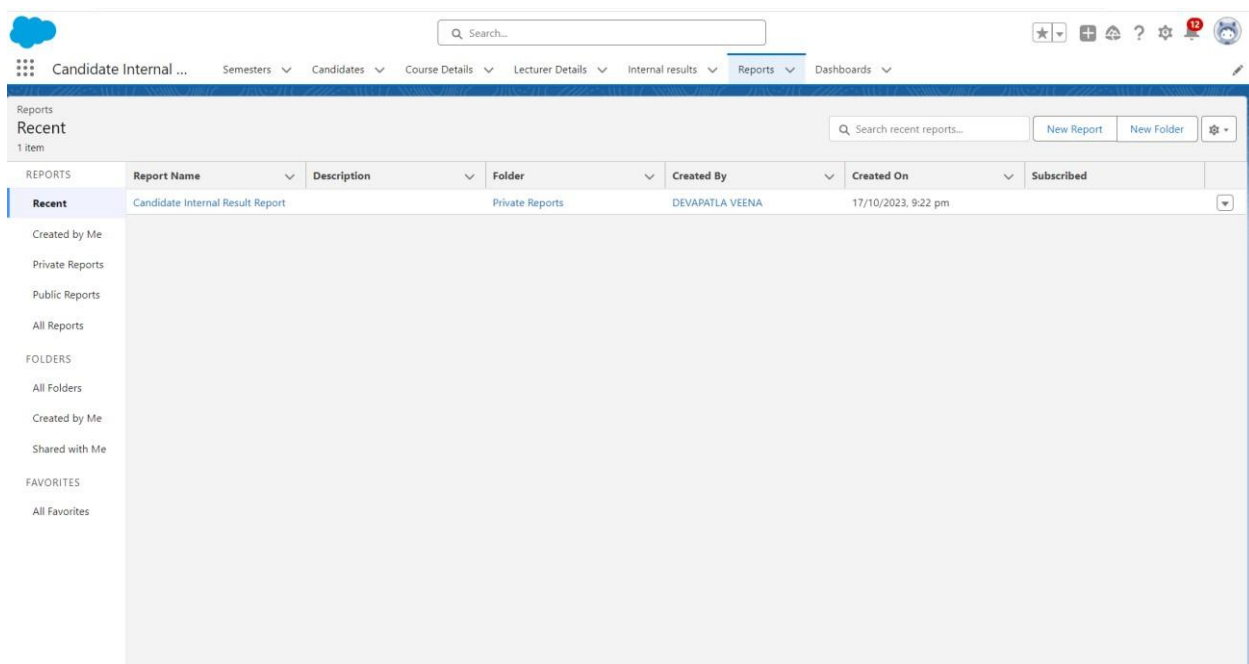

Tabular Reports:

This is the most basic report format. It just displays the row of records in a table with a grand total. While easy to set up they can't be used to create groups of data or charts and also cannot be used in Dashboards. They are mainly used to generate a simple list or a list with a grand total.

Summary Reports:

It is the most commonly used type of report. It allows grouping of rows of data, view subtotal, and create charts.

Matrix Report:

It is the most complex report format. Matrix report summarizes information in a grid format. It allows records to be grouped by both columns and rows. It can also be used to generate dashboards. Charts can be added to this type of report.

Joined Reports:

These types of reports let us create different views of data from multiple report types. The data is joined reports are organized in blocks. Each block acts as a sub-report with its own fields, columns, sorting, and filtering. They are used to group and show data from multiple report types in different views.

Report types:

Report type determines which set of records will be available in a report. Every report is based on a particular report type. The report type is selected first when we create a report. Every report type has a primary object and one or more related objects. All these objects must be linked together either directly or indirectly.

A report type cannot include more than 4 objects. Once a report is created its report type cannot be changed.

There are 2 types of report types:

Standard Report Types: Standard Report Types are automatically included with standard objects and also with custom objects where “Allow Reports” is checked. Standard report types cannot be customized and automatically include standard and custom fields for each object within the report type. Standard report types get created when an object is created, also when a relationship is created.

Note: Standard report types always have inner joins.

Custom Report Types: Custom report types are reporting templates created to streamline the reporting process. Custom Reports are created by an administrator or User with “Manage Custom Report Types” permission. Custom report types are created when standard report types cannot specify which records will be available on reports.

In custom report types we can specify objects which will be available in a particular report.

The primary object must have a relationship with other objects present in a report type either directly or indirectly.

There are 3 types of access levels of folders:

Viewer: With this access level, users can see the data in a report but cannot make any changes except cloning it into a new report

Editor: With this access level, users can view .

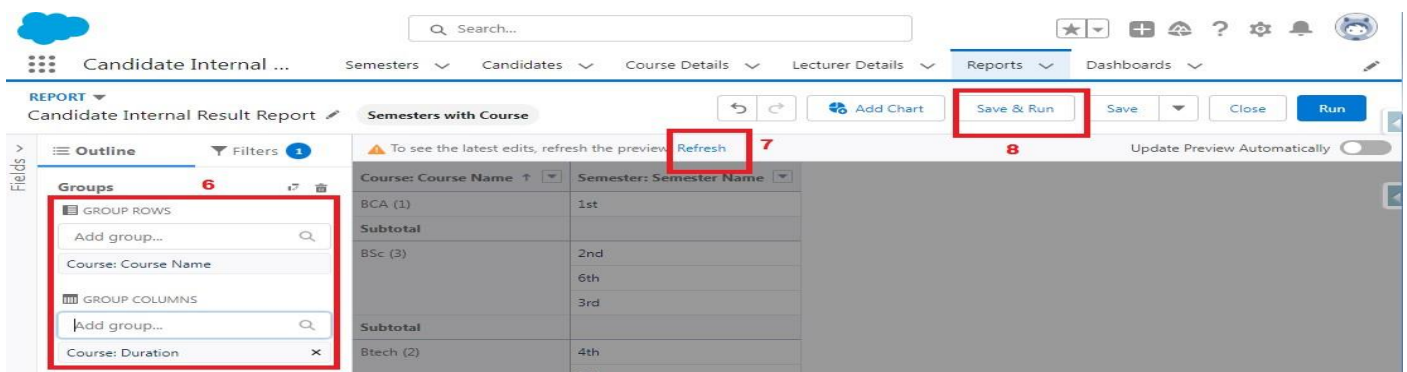

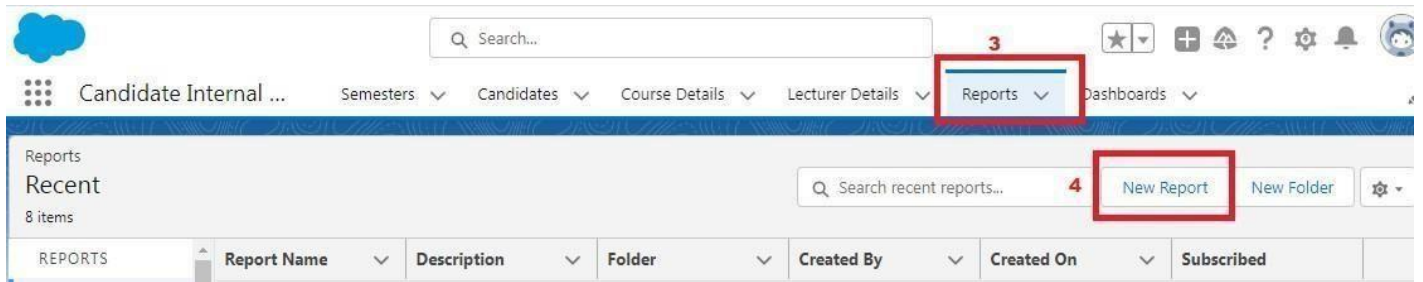

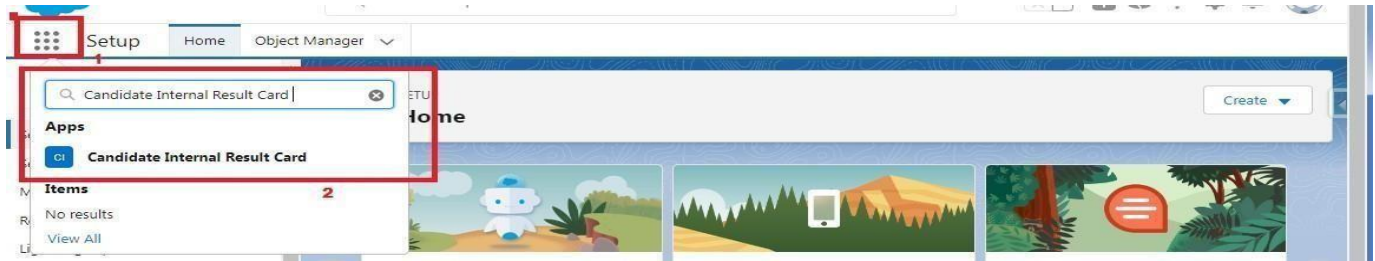

Manager: With this access level, users can do everything Viewers & Editors can do, plus they can also control other user’s access levels to this folder. Also, users with Manager Access levels can delete the report.

Create Report

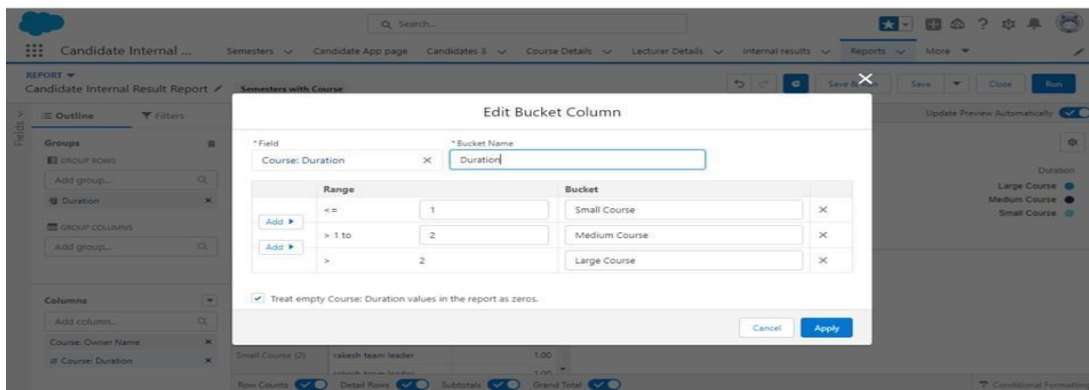

1. Click App Launcher
2. Select Candidate Internal Result Card App
3. Click reports tab
4. Click New Report.
5. Click the report type as Semesters with Course Click Start report.
6. Customize your report, in group rows select - Course Name, in group column Select Duration (In this way we are making a Matrix Report).
7. Click refresh
8. Click save and run

9. Give report name – Candidate Internal Result Report

10. Click Save

1. On the report builder page, locate the "Fields" pane on the left-hand side.
2. Find the field for which you want to create a bucket field and drag it to the report preview section.
3. Click on the field in the report preview to open the field properties.
4. In the field properties, locate the "Summarize" option and click the drop-down arrow.
5. Select "Bucket Field" from the available options.
6. In the bucket field settings, define the buckets based on your requirements. You can specify the bucket ranges, labels, and groupings.
7. Click "OK" or "Apply" to save the bucket field settings.
8. Customize the report layout and add any additional fields or filters as needed.
9. Once you are satisfied with the report setup, click "Save" to save the report.

Milestone – 06: dashboards

Dashboards

Dashboards let you curate data from reports using charts, tables, and metrics. If your colleagues need more information, then they are able to view your dashboard's data-supplying reports. Dashboard filters make it easy for users to apply different data perspectives to a single dashboard.

Create Dashboard

1. Click on Dashboards tab from the Candidate Internal Result Card application.
2. Click on new dashboard.
3. Give name- Candidate Internal Result Card
4. Click create
5. Give your dashboard a name and click on +component
6. Select the Candidate Internal Result Report which you created.
7. For the data visualization select any of the chart, table etc. as per your choice/requirement.
8. Click add.
9. Click save.
